ANIME BUFF
WebPage Design

Required Web Pages :

♯ Start Page
♯ Main Page
♯ Anime Page
♯ Admin Page
♯ Portolio
♯ Loading Page

Bootstrap will be used in the program to make it as presentable as possible.

Start Page:

(BluePrint)

The **First page** that comes under the View when the Website is first entered.

This will include a baskgroung picture of "Kei Karuizawa" with the Button to Enter the **Main page** on click.

This page will be loaded to perform certain Python functions that will be necessary to work on the website and start buffering anime.

These functions will include operations like : making the **list of anime** Available in the anime Directory, making the empty **list for the search bar**, copying the anime list and shuffeling them to **create a random Search**.

(BluePrint) LIST

| | HEADER | Search Bar | S |

ANIME LIST ENTITY   1 :
ANIME PICTURE   +   ANIME NAME

ANIME LIST ENTITY   2 :
ANIME PICTURE   +   ANIME NAME

ANIME LIST ENTITY   3 :
ANIME PICTURE   +   ANIME NAME

ANIME LIST ENTITY   4 :
ANIME PICTURE   +   ANIME NAME

The **Main page** that we enter as soon as we click on Start Buffering button in the **Start Page**.

This page will include the list of all the animes in the anime directory.

The Page will also include some **static widgets** that will be useful for the user in all the pages. Such as *Search Bar, display logo with reload*, Header & *Side bar with Links and other useful Routings*.

Clicking on the Anime BUFF logo must shufle the list.

Currently , anime listing options are in two types :
✓ as a Tile format
✓ as a List Format

The Tile format will be requied to create a lot of Different of objects for the same type with different Anime names and link … {Complete Understanding of Django Might be required}.

The List format is simpler than whatever other format might be chosen . Here no need to create new instences with new names , but rendering the list with the Anime picture in it will be more than enough . Shuffeling and Randomizing will be easier.

The Page will furthur feature a Side bar which will include Links to the other anime Websites and Entertainment Sites. This will also be featuring A Developer Portfolio.

The style of the page is not yet confirmed , it may include The styles mentioned or turn to other options that are available in the bootstrap CSS files , hence Affecting productivity.

The style of the Webpage may be changes after Detailed review of Stack holder {which will be my friends Ofcourse}.

Wotakoi : Love is Hard for Otaku

Anime Page:

(BluePrint)

The **page** that is generated by the python Interpreter during clicking or loading of an anime Title page and then rendered into a webpage.

The Page will also include some **static widgets** that will be useful for the user in all the pages. Such as *Search Bar, display logo with reload*, Header & *Side bar with Links and other useful Routings*.

The Content of the page are : Anime Poster, The trailer of anime {if needed}, Anime Description , Anime Extras (additional ScreenShots & pictures) and Finally The Episode List.

The anime Episode list will only be in the list format [personal preference].

The optional Widgets in the webpage are Trailer and Extras . They will not be rendered if those files are not present in the Anime Title Directory.

The complicated part about the programming will be mentioned in the "Anime BUFF Planning" documentation…

[Example Picture]

Wotakoi : Love is Hard for Otaku

The main characters are Narumi, a female office worker who
hides her fujoshi lifestyle, and Hirotaka, a handsome and
capable company man who is a game otaku. The two seem perfect
for each other, but love is difficult for otaku.
After some post-work drinking sessions they begin dating, but
will it be a perfect relationship for the two?
